ABLE TO CARE FOR ANY PATIENTS REQUIRING ADMISSION

As of January 9, 2020

REGIONAL STAY-AT-HOME ORDER

- Southern California remains under Stay-at-Home order; four-week ICU capacity projections do not meet criteria to exit order.
- Effective Sunday, December 6 at 11:59 p.m., Mono County (as part of the Southern California Region) was formally placed under the California Department of Public Health (CDPH) *Regional Stay-At-Home Order*.
- The Order will be lifted when regional available adult ICU bed capacity is **greater than or equal to 15%** and is projected to remain above that level for the subsequent four weeks.
- At the end of the Stay-At-Home period, each county within the Region will be assigned to a tier based on the Blueprint for a Safer Economy.

<https://covid19.ca.gov/stay-home-except-for-essential-needs/>

REGIONAL STAY-AT-HOME ORDER

- [Southern California*](#) (Mono County) Current ICU Capacity: 0.0%
- ICU capacity projections for regions that are eligible to exit the order are **calculated daily** based on four factors:
 1. Current estimated regional ICU capacity available
 2. Measure of current community transmission
 3. Current regional case rates, and
 4. Proportion of ICU cases being admitted
- Decreasing community transmission and increasing the health system capacity can help a region's projected ICU capacity so they can exit the order.
